ABSTRACT

Our willingness to sacrifice is an indication of our devotion to God. "Sacrifice" does not mean the rejection of the worthless, but of the precious. "Sacrifice" does not mean the rejection of the evil for the sake of the good, but of the good for the sake of the evil. "Sacrifice" is the surrender of that which you value in favor of that which you don't. Nursing students have strong relationship in sacrificing behavior. A sacrifice is the surrender of a value. Full sacrifice is full surrender of all values. If you wish to achieve full virtue, you must seek no gratitude in return for your sacrifice, no praise, no love, no admiration, no self-esteem, not even the pride of being virtuous; the faintest trace of any gain dilutes your virtue. The methodology adopted in the study was Design: Descriptive, Method: Normative, and Technique: Survey and the sample was 145 women undergraduate nursing students in Madurai District. The dependent variable is sacrificing behavior and the independent variables are Economic Status, Nativity, Father's Occupation, Mother's Occupation and Generation in Higher Education

The Government, NGO's and educational institutions should take steps for conducting sacrificing oriented courses, programs, seminars, conferences etc. to nurse students. This study will be helpful in all angles for the policy maker, educational administrators and researchers.

Keywords: Sacrificing Behaviour, Nursing Students

INTRODUCTION:

Sacrifice means giving to the Lord whatever He requires of our time, our earthly possessions, and our energies to further his work. Our willingness to sacrifice is an indication of our devotion to God. "Sacrifice" does not mean the rejection of the worthless, but of the precious. "Sacrifice" does not mean the rejection of the evil for the sake of the good, but of the good for the sake of the evil. "Sacrifice" is the
