Consultancy Service Profile

Consultancy service is offered in:

- Designing and testing of Solar Thermal and Photovoltaic Systems as per standard procedures.
- Inspecting and monitoring manufacturers of solar devices to ensure the quality of products.
- Electrical and Thermal Energy Audit of institutions and industries and replacement of conventional technology by Solar Thermal and Photovoltaic Systems to meet the energy demand.

Facilities Available

Thermal efficiency test

Incident angle modifier test

Solar Simulator

Power Meter

Pyranometer

Test beds for solar thermal devices

1 kW Photovoltaic Power Plant
