

# Webinar on Climate Smart Resilience Children and Education Sector

12 April 2021,  
15.00-17.00 Hrs.

**National Institute of Disaster Management, New Delhi & Department of Economics, DDE, Madurai Kamaraj University, Madurai Tamil Nadu**

## BACKGROUND

The increase of extreme and erratic weather events like floods, cyclones and erosions in disaster prone areas in India is deeply impacting the lives of children and their families. As a result, children are forced to leave their homes and schools, it hampers their health and family livelihoods, and it limits their access to health care.

Children are uniquely susceptible to physical and emotional harm during extreme weather events especially if they are unaware of how to respond to danger, or have the support they need to recover from the emotional distress caused by climate-related disasters such as loss of loved ones and homes. Schools may be damaged or hard to reach further limiting their access to support services.

This webinar is intended to discuss the issues related to climate change and resilience children. Further this webinar also focus on climate smart resilience children and education sector.

## AIM OF WEBINAR

This **Webinar on Climate Smart Resilience Children and Education Sector** is intended for officials of State level sectoral departments, Administrative Training Institutions and civil society practitioners, teachers and students to help build their knowledge, and perspectives.
